

## Potential Public Water Access Marker Designs

Which color should be used for a carry in access point R-O-W marker that is visible from the water? Brown, green, or another color?

Picture Source: TAPCO Traffic

This white text box would face the water and have a white reflective strip underneath it.

I could make the whole white text plaque reflectorized, but that only lasts for about 10 years. When the actual reflective strip loses its reflectivity, then anyone can just cut a new reflective pvc sticker, and apply it over the existing worn out reflective strip.

**Replace:**

“CAUTION Water Pipeline”  
 “Digger’s Hotline logo and text.”

**With:**

“Carry In Public Access”  
 “Local government’s contact information.”

Reflective strip (white reflective tape) This sticker will help users find this point from the water by using a flashlight and aiming it at the shore.

## Potential Public Water Access Marker Designs

Picture Source: Google

Dashed line outlines a carry in public access land parcel.  
Each corner of this parcel would have a delineator.
